BBC
Antenna 3 TV (Spain)
Sex Mundi (Spain)
MuchMusic (Canada)
NPR (Sweden)

- Buck Angel was born genetically female but lived much of his childhood generally treated and accepted as a boy by family and peers.
- The onset of puberty, however, started a confusing time that led to extreme distress and loathing over what he was feeling.
- Unfortunately, Buck turned to drugs and alcohol to deal with the conflict. Despite a successful career as a female high-fashion model, the self-destructive behaviors continued to take him in a downward spiral.
- After viewing a documentary about a female-to-male transsexual, Buck was inspired to embrace the gender that felt most natural to him.
- Buck began taking the necessary hormones and underwent breast-removal surgery. His transformation has led to peace and self-acceptance.
- After gender reassignment, Buck Angel began working in the Adult-Industry as a Fetish filmmaker and website creator for the male-to-female (MTF) on-line market. Buck Angel made history as the Adult Industry's first female-to-male Porn Star and Adult-film producer.
- Buck Angel used his fame and resources to create Public Service Announcements on health for transsexuals, gays, and women around sensitive issues with very little information available.
- Now Buck Angel is the man he has always wanted to be. His message of empowerment through self-acceptance is universal, despite his unique accomplishments.
- Buck Angel is prepared to share his story at your event.

"It's not what's between your legs that defines you!"

-Buck Angel
